RUSSIAN ACADEMY OF SCIENCES. IZVESTIYA. MATHEMATICS

Том 56, №№ 4–6, 1992

Volume 41, Numbers 1–3 Pages 1–591

Volume Index of Authors

Ageev, S. M. Classification of G-spaces 581
Allakhverdiev, B. P. On the theory of nonselfadjoint operators of Schrödinger type with a matrix potential 193
Arnol'd, V. I. Congruences for Euler, Bernoulli, and Springer numbers of Coxeter groups 389
Babenko, I. K. Asymptotic invariants of smooth manifolds 1
Bakhtin, V. I. A direct method of constructing an invariant measure on a hyperbolic attractor 207
Belen'kiĭ, V. Z. Sufficient optimality conditions for linear differential inequalities with discontinuous trajectories 39
Bogoyavlenskiĭ, O. I. Integrable problems of the dynamics of coupled rigid bodies 395
Bulitko, V. K. Letter to the editor 185
Fursikov, A. V. Moment theory for the Navier-Stokes equations with a random right side 515
Gonchenko, S. V. and Shil'nikov, L. P. On moduli of systems with a structurally unstable homoclinic Poincaré curve 417
Gritsenko, S. A. Three additive problems 447
Imomkulov, S. A. Twice differentiability of subharmonic functions 157
Khrennikov, A. Yu. and Endo, M. Unboundedness of a p-adic Gaussian distribution 367
Kochubeĭ, A. N. The differentiation operator on subsets of the field of p-adic numbers 289
Kolesov, A. Yu. and Kolesov, Yu. S. Relaxation cycles of differential-difference equations 75
Kulikov, Vik. S. Generalized and local Jacobian problems 351
Kulikov, Vik. S. On the Lefschetz theorem for the complement of a curve in $\mathbb{P}^2$ 169
Levenshtam, V. B. Averaging of quasilinear parabolic equations with rapidly oscillating principal part. Exponential dichotomy 95
Lobanov, S. G. Picard's theorem for ordinary differential equations in locally convex spaces 465
Merzlyakov, S. G. Invariant subspaces of the unit shift operator 489

Neretin, Yu. A. On combinatorial analogs of the group of diffeomorphisms of the circle 337
Orlov, D. O. Projective bundles, monoidal transformations, and derived categories of coherent sheaves 133
Pidkuĭko, S. I. On the denseness of the set of nonintegrable Hamiltonians ... 143
Plaksin, V. A. Letter to the editor: Correction to the paper "The distribution of numbers representable as a sum of two squares" 187
Prudnikov, I. M. Necessary and sufficient conditions for the representability of a positive homogeneous function of three variables in the form of a difference of convex functions 377
Sataev, E. A. Gibbs measures for one-dimensional attractors of hyperbolic mappings with singularities 567
Shirokov, L. V. On AE(n)-bicompacta 557
Sklyarenko, E. G. Connection homology and cohomology between sets. Enclosure homology and cohomology of a closed set 307
Vladimirov, V. S. On spectral properties of p-adic pseudodifferential operators of Schrödinger type 55
Vladimirov, V. S. and Sergeev, A. G. On the one-hundredth anniversary of the birth of I. M. Vinogradov 189
Voronin, S. M. On Kloosterman sums 229
Zarnadze, D. N. On some topological and geometrical properties of Fréchet-Hilbert spaces 273
